Hello,

Although I have been taking 10 or 11 students instead of 8 per segment, After-School Droid Lab for K-3 has only six spots remaining in the April segment.

All other segments are full as of today.

There are four spots left for grades 4-5 in the January and February segments, and five spots left in the April segment.

**However**, ANYONE who wants to come to our **BST Bot Hockey** event in the **Robot Ruckus** spectator area on November 4<sup>th</sup> and 5<sup>th</sup> are welcome to come and try your luck in a robot hockey match.

All BST students will be battling against hundreds of patrons at the incredible **Orlando Maker Faire**.

If you have never experienced this tremendous S.T.E.A.M. event, you are *missing out!*

**Employees of schools, colleges, universities, and libraries** receive **free** admission to Maker Faire Orlando 2023 with identification. Please see our [Educators page](#) for more information including requirements and restrictions.

**First Responders, Active Military and Veterans** receive **free admission** to Maker Faire Orlando 2023 with identification. Simply bring your identification to the ticket booth at the event to receive a free ticket per eligible person with identification.

**Choose your tickets on their Website:**
