List the names and dates and answers of where or from whom you found the solutions below:

What is wrong with your robot??? 1st go and RE-read your Viper Kit manual or the directions sheet for your weapon--- **MORE CAREFULLY!** 2nd go to Team Witch Doctor's YouTube channel, or Fingertech's channel, or use Google to search for a specific solution. Then ask a captain what they think may be causing the problem. Then try to repair it yourself before you ask me to repair your robot!
